Strong Performance

- Algeria has devised a National Nutrition Policy/Strategy.
- Policymakers in Algeria benefit from regular nutrition surveys that are statistically representative at national level. The last survey was published in 2012-2013.
- The Government of Algeria has achieved two high doses of vitamin A supplementation for 93% of children in 2005.
- In Algeria 92.7% of women aged 15-49 were visited at least once during pregnancy by skilled health personnel in 2013.
- In Algeria, constitutional protection of the right to social security is strong.
- Algeria's social safety nets are well developed, but do not cover all risks for all of the population.
- Strong civil registration rates (99.4% in 2006) potentially enable children's access to critical public services such as health and education.

Areas for improvement

- Spending on agriculture (4.72% of public spending in 2014), does not meet government commitments set out in the African Union's Maputo Declaration (10% of public spending).
- Algeria's spending in its health sector (9.9% of public spending in 2014) does not fully meet (15%) commitments set out in the Abuja Declaration.
- In Algeria, the law gives women and men equal economic rights and equal legal access to agricultural land. However, these laws are not effectively enforced and discriminatory practices against women continue, increasing their vulnerability to hunger and undernutrition.
- Relative to other HANCI countries, Algeria's medium/long term national development policy (Plan d'Action du gouvernement pour la mise en oeuvre du programme du Président de la République) places weak importance to nutrition.
- Algeria does not have a separate budget line for nutrition; this prevents transparency and accountability for spending.
- Even though Algeria has developed a National Nutrition Policy/Strategy, clear time-bound nutrition targets and a multisectoral and multistakeholder policy coordination mechanism are still lacking.
- The Government of Algeria does not promote complementary feeding practices.
- In Algeria, constitutional protection of the right to food is weak.
