

Key data for Nigeria

Existing rates of: **Wasting: 7.9%** **Stunting: 32.9%** **Proportion of population underweight: 19.8%**

Source: Gov. of Nigeria (National Nutrition and Health Survey, 2014)

Strong Performance

- The National Nutrition Policy/Strategy identifies time bound nutrition targets and a multisectoral and multistakeholder policy coordination mechanism has been set up.
- Policymakers in Nigeria benefit from regular nutrition surveys that are statistically representative at national level. The last survey was published in 2015.
- The Government of Nigeria promotes complementary feeding practices.
- In Nigeria, constitutional protection of the right to social security is strong.

Areas for improvement

- Spending on agriculture (3.05% of public spending in 2014), does not meet government commitments set out in the African Union's Maputo Declaration (10% of public spending).
- Nigeria's spending in its health sector (8.2% of public spending in 2014) does not fully meet (15%) commitments set out in the Abuja Declaration.
- In Nigeria, the law does not give women economic rights equal to men. Men and women have equal legal access to agricultural land, but this is not effectively enforced and discriminatory practices against women continue, increasing their vulnerability to hunger and undernutrition.
- Relative to other HANCI countries, Nigeria's medium/long term national development policy (Nigeria Vision 20: 2020) places weak importance to nutrition.
- Nigeria does not have a separate budget line for nutrition; this prevents transparency and accountability for spending.
- Weak access to an improved source of drinking water (68.5% in 2015) and an improved sanitation facility (29% in 2015) prevents positive outcomes for hunger and nutrition in Nigeria.
- In Nigeria only 60.6% of women aged 15-49 were visited at least once during pregnancy by skilled health personnel in 2013.
- In Nigeria, constitutional protection of the right to food is weak.
- Social safety nets in Nigeria are basic and only cover few risks for a limited number of beneficiaries.
