**HUNGER AND NUTRITION COMMITMENT INDEX AFRICA (HANCI-AFRICA)**

**Key data for Senegal**

HANCI-Africa compares 45 African countries for their performance on 22 indicators of political commitment to reduce hunger and undernutrition. Country scores are calculated in relation to the political commitment of the other countries in the index.

### Strong Performance

- The Government encourages varied agricultural research and extension services, and local farmer organisations are involved in setting policy priorities. The extension system is effective and properly reaches out to poor farmers. Government policies, strategies and mechanisms seek to ensure gender equity in access to extension services.
- Relative to other HANCI countries, Senegal’s medium/long term national development policy (Stratégie National de Développement Economique et social (SNDES)) assigns strong importance to nutrition.
- Senegal instituted a separate budget line for nutrition, enabling transparency and accountability for spending.
- The National Nutrition Policy/Strategy identifies time bound nutrition targets and a multisectoral and multistakeholder policy coordination mechanism has been set up.
- Policymakers in Senegal benefit from regular nutrition surveys that are statistically representative at national level. The last survey was published in 2014.
- The Government of Senegal promotes complementary feeding practices.
- In Senegal 96.2% of women aged 15-49 were visited at least once during pregnancy by skilled health personnel in 2014.

### Areas for improvement

- Spending on agriculture (7.77% of public spending in 2014) is close to, yet not fully meeting government commitments set out in the African Union’s Maputo Declaration (10% of public spending).
- Senegal’s spending in its health sector (8% of public spending in 2014) does not fully meet (15%) commitments set out in the Abuja Declaration.
- In Senegal, the law does not give women economic rights equal to men. Men and women have equal legal access to agricultural land, but this is not effectively enforced and discriminatory practices against women continue, increasing their vulnerability to hunger and undernutrition.
- Weak access to improved sanitation facilities (47.6% in 2015) obstructs better hunger and nutrition outcomes.
- In Senegal, constitutional protection of the right to social security is weak.
- Social safety nets in Senegal are basic and only cover few risks for a limited number of beneficiaries.

**Existing rates of:**

- **Wasting:** 5.8%
- **Stunting:** 19.4%
- **Proportion of population underweight:** 12.8%
