

Key data for Angola

Existing rates of: **Wasting: 4.9%** **Stunting: 37.6%** **Proportion of population underweight: 19%**

Source: Government of Angola (DHS, 2015-16)

Strong Performance

- Spending on agriculture (14.8% of public spending in 2016) meets government commitments set out in the African Union's Maputo Declaration (10% of public spending).
- The Government of Angola has ensured tenure security for rural populations. Land titling is common and land markets function well. Policy promotes equitable access to common property resources.
- Angola has devised a National Nutrition Policy/Strategy.
- Policymakers in Angola benefit from regular nutrition surveys that are statistically representative at national level. The last survey was published in 2015-2016.
- The Government of Angola promotes complementary feeding practices.
- In Angola, constitutional protection of the right to social security is strong.

Areas for improvement

- Angola's spending in its health sector (3.7% of public spending in 2015) does not fully meet (15%) commitments set out in the Abuja Declaration.
- In Angola, the law gives women and men equal economic rights and equal legal access to agricultural land. However, these laws are not effectively enforced and discriminatory practices against women continue, increasing their vulnerability to hunger and undernutrition.
- Relative to other HANCI countries, Angola's medium/long term national development policy (MPLA Development Program) places weak importance to nutrition.
- Angola does not have a separate budget line for nutrition; this prevents transparency and accountability for spending.
- Even though Angola has developed a National Nutrition Policy/Strategy and clear time-bound nutrition targets, a multisectoral and multistakeholder policy coordination mechanism is still lacking.
- The Government of Angola has not enshrined the International Code of Marketing of Breastmilk Substitutes into domestic law.
- The Government of Angola has achieved two high doses of vitamin A supplementation for only 14% of children in 2015.
- Weak access to an improved source of drinking water (53.9% in 2016) and an improved sanitation facility (36.1% in 2016) prevents positive outcomes for hunger and nutrition in Angola.
- Social safety nets in Angola are basic and only cover few risks for a limited number of beneficiaries.

Key data for Angola

Hunger Reduction Commitment Index (HRCI)

Public spending	Score*	Year	HRCI Rank of 45
Public spending on agriculture as share of total public spending ¹	14.8%	2016	3rd
Public spending on health as share of total public spending ²	3.7%	2015	39th
Policies			
Access to land (security of tenure) ³	Strong	2016	Joint 11th
Access to agricultural research and extension services ³	Moderate	2013	Joint 29th
