

# Key data for Côte d'Ivoire

Existing rates of: **Wasting: 7.6%** **Stunting: 29.6%** **Proportion of population underweight: 15.7%**

Source: Government of Côte d'Ivoire (DHS and MICS, 2011-12)

## Strong Performance

- Relative to other HANCI countries, Côte d'Ivoire's medium/long term national development policy (Programme national de développement Tome I Diagnostic stratégique) assigns strong importance to nutrition.
- Côte d'Ivoire instituted a separate budget line for nutrition, enabling transparency and accountability for spending.
- The National Nutrition Policy/Strategy identifies time bound nutrition targets and a multisectoral and multistakeholder policy coordination mechanism has been set up.
- Policymakers in Côte d'Ivoire benefit from regular nutrition surveys that are statistically representative at national level. The last survey was published in 2016.
- The Government of Côte d'Ivoire promotes complementary feeding practices.
- In Côte d'Ivoire 90.6% of women aged 15-49 were visited at least once during pregnancy by skilled health personnel in 2011-2012.
- In Côte d'Ivoire, constitutional protection of the right to social security is strong.

## Areas for improvement

- Spending on agriculture (1.9% of public spending in 2016), does not meet government commitments set out in the African Union's Maputo Declaration (10% of public spending).
- Côte d'Ivoire's spending in its health sector (5% of public spending in 2015) does not fully meet (15%) commitments set out in the Abuja Declaration.
- In Côte d'Ivoire, the law gives women and men equal economic rights and equal legal access to agricultural land. However, these laws are not effectively enforced and discriminatory practices against women continue, increasing their vulnerability to hunger and undernutrition.
- Weak access to improved sanitation facilities (29.9% in 2015) obstructs better hunger and nutrition outcomes.
- Social safety nets in Côte d'Ivoire are basic and only cover few risks for a limited number of beneficiaries.
- Civil registration rates are weak (65% in 2011-2012) and potentially hold back children's access to critical public services such as health and education.

**Key data for Côte d'Ivoire**

### Hunger Reduction Commitment Index (HRCI)

Public spending	Score*	Year	HRCI Rank of 45
 Public spending on agriculture as share of total public spending <sup>1</sup>	 1.9%	2016	Joint 39th
 Public spending on health as share of total public spending <sup>2</sup>	 5%	2015	Joint 32nd
<b>Policies</b>			
 Access to land (security of tenure) <sup>3</sup>	 Moderate	2016	Joint 34th
