### Strong Performance

- The Government of Uganda has ensured tenure security for rural populations. Land titling is common and land markets function well. Policy promotes equitable access to common property resources.
- The Government encourages varied agricultural research and extension services, and local farmer organisations are involved in setting policy priorities. The extension system is effective and properly reaches out to poor farmers. Government policies, strategies and mechanisms seek to ensure gender equity in access to extension services.
- The National Nutrition Policy/Strategy identifies time bound nutrition targets and a multisectoral and multistakeholder policy coordination mechanism has been set up.
- Policymakers in Uganda benefit from regular nutrition surveys that are statistically representative at national level. The last survey was published in 2016.
- The Government has fully enshrined the International Code of Marketing of Breastmilk Substitutes into domestic law.
- The Government of Uganda promotes complementary feeding practices.
- In Uganda 93.3% of women aged 15-49 were visited at least once during pregnancy by skilled health personnel in 2011.
- In Uganda, constitutional protection of the right to social security is strong.

### Areas for improvement

- Spending on agriculture (4% of public spending in 2015), does not meet government commitments set out in the African Union's Maputo Declaration (10% of public spending).
- Uganda's spending in its health sector (5.6% of public spending in 2015) does not fully meet (15%) commitments set out in the Abuja Declaration.
- In Uganda, the law does not give women economic rights equal to men. Men and women have equal legal access to agricultural land, but this is not effectively enforced and discriminatory practices against women continue, increasing their vulnerability to hunger and undernutrition.
- The Government of Uganda has achieved two high doses of vitamin A supplementation for only 66% of children in 2014.
- Weak access to improved sanitation facilities (20.8% in 2016) obstructs better hunger and nutrition outcomes.
- In Uganda, constitutional protection of the right to food is weak.
- Social safety nets in Uganda are basic and only cover few risks for a limited number of beneficiaries.
- Civil registration rates are weak (32.2% in 2016) and potentially hold back children's access to critical public services such as health and education.
